## PROFILE SUMMARY

Master's in Computer Applications with **1.3 Years** of experience in frontend development, specializing as a **UI developer, web developer, and web designer**. Proficient in **HTML4, HTML5, CSS2, CSS3, Bootstrap, SASS, ReactJS, Hooks, Redux, JavaScript, XML, JSON, API integration, NodeJS, ExpressJS, EJS, MySQL, MySQL Server**.

## EDUCATION

Chandigarh University

Master of Computer Applications (MCA)

2021 – 2023

Mohali, Punjab

B.S. College, Danapur

Bachelor of Science in Mathematics

2017 – 2020

Patna, Bihar

St. Xavier's High School (BSEB)

Intermediate (Mathematics)

2015 – 2017

Patna, Bihar

D K Carmel Residential High School (CBSE)

Matriculation

2014 – 2015

Arrah, Bihar

## TECHNICAL SKILLS

- **Frontend Development:** HTML, CSS, JavaScript, Bootstrap, SASS, Ajax, JSON, XML, Hooks, React.js, Redux, Restful APIs
- **Backend Development:** NodeJS, ExpressJS, EJS
- **Database:** MySQL, MySQL Server
- **Tools:** NPM, VS Code, MS Office, AI Tools
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux, Windows, MacOS

## EXPERIENCE

ReactJS Developer

Aiml Labs Pvt Ltd

Jan 2024 – Present

Bangalore, India

- Collaborated with multiple clients to design and develop responsive and user-friendly websites using **HTML5, CSS3, JavaScript, ReactJS, and Bootstrap**.
- Worked in **Agile teams using Scrum methodology and Jira tools** for project management.
- Integrated **RESTful APIs** and optimized website performance to ensure **fast load times and smooth user experiences**.
- Utilized **Git and GitHub** for version control and deployment across various projects.

## PROJECTS

PixelPro Technologies

Live Link (Ongoing)

- Developed responsive web pages using **HTML, CSS, Bootstrap, JavaScript, ReactJS, Redux, and Material-UI**, ensuring seamless compatibility across various devices. Focused on delivering an optimized user experience by applying **responsive design techniques and performance best practices**. Maintained a **clean, modular, and scalable front-end architecture** that allowed for easy updates and future enhancements. The use of **modern UI libraries and state management tools** ensured a smooth and interactive user interface for better engagement and functionality.

The Grow Study

GitHub Repository

- I created responsive web pages using **HTML, CSS, Bootstrap, JavaScript, ReactJS, and React Router**. The focus was on building interactive UI components and optimizing application performance. I implemented **dynamic data routing** to ensure smooth and seamless navigation between **pages, enhancing the overall user experience**. The project prioritized **clean design and responsiveness** across all devices.

## FirstEnquiry Career's

[Live Link](#)

- Developed a dynamic job portal for **FirstEnquiry.com's** career page using **React, Redux, Hooks, APIs, Bootstrap, Font Awesome, and various React libraries**. The project featured an intuitive user interface, efficient job listing, and seamless application tracking functionality. It aimed to streamline the recruitment process, making it easier for users to **explore and apply for jobs**. The use of modern technologies ensured **responsiveness, improved performance, and enhanced overall user experience** across different devices and screen sizes.

## Contact Manager

[Github Repository](#)

- The Contact Manager is a web application developed using **Node.js, Express, EJS and MySQL**. It enables users to manage contacts by adding, editing, deleting, and searching entries that include a photo, name, email, and address. All contact details are securely stored in a **MySQL database, ensuring efficient data management and retrieval**. The application features a responsive interface with **real-time search functionality**, making it easy to organize and access contact information for both personal and professional use.
